EDUCATION

Delhi Technological University

B.Tech in Computer Science and Mathematics

2023-2027

CGPA:8.52

EXPERIENCE

AI Research Intern

June 2026 – July 2026

Early-Stage Stealth Startup (Conversational AI/NLP)

Remote

- Contributed in exploratory data analysis, feature engineering, and data preprocessing to improve dataset quality for machine learning tasks.
- Assisted in developing NLP-based text classification solutions by performing text preprocessing, feature extraction, and model evaluation to improve query categorization and chatbot performance.

PROJECTS

Multi-Asset Risk Intelligence Platform | Python, FastAPI, Scikit-Learn, SciPy, NumPy

GitHub | Demo

- Built a real-time risk analytics pipeline for 32 assets using a FastAPI/React framework, forecasting 5-day forward volatility by comparing GARCH(1,1) with a Gradient Boosting Regressor.
- Implemented an asset allocator using Ledoit-Wolf Covariance Shrinkage to stabilize weight allocations (Max Sharpe, Risk Parity), and applied unsupervised K-Means clustering to map dynamic market risk regimes.

AutoEDA.AI | Python, Streamlit, Scikit-Learn, Plotly, Pandas

GitHub | Demo

- Built an interactive data analytics dashboard performing automated profiling, duplicate filtering, and Pearson correlations, featuring anomaly detection via an Isolation Forest algorithm.
- Designed an AutoML engine that auto-detects task type (Regression/Classification), executes variables preprocessing, trains Random Forest models against baselines, and renders Gini feature importances.

Salary Manager Pro | Python, Flask, SQLite, JavaScript, Pandas

GitHub | Demo

- Engineered a multi-tenant ledger and payroll web app with secure workspace isolation, using SQLite and SQLAlchemy ORM to manage employee transactional records.
- Developed a double-entry bookkeeping ledger mapping debits and credits to calculate real-time dues, integrating dynamic payroll rules to scale salary proportionally based on monthly active days.

TECHNICAL SKILLS

Languages: Python, C++, C, MySQL, PostgreSQL, MATLAB.

Libraries & Tools: NumPy, Pandas, Scikit-learn, SciPy, Plotly, SQLAlchemy, TensorFlow, MongoDB, Git, Streamlit.

Core Skills: DSA, Exploratory Data Analysis, Time-Series Analysis, Machine Learning, Deep Learning.

Relevant Coursework: Algorithm Design and Analysis, Database Management System, Probability and Statistics, Operating System, Linear Algebra, Object Oriented Programming, Financial Engineering.

ACHIEVEMENTS

- Secured 98.67 percentile in JEE Mains 2023 (AIR 16,731 out of 1.2M candidates) and qualified JEE Advanced 2023.
- Semi-Finalist at Smart India Hackathon (SIH) 2024 among top national teams.

POSITIONS OF RESPONSIBILITY

President — Society for Industrial and Applied Mathematics (SIAM-DTU)

June 2025 – July 2026

- Led the SIAM DTU Chapter to organize 'Financial Cricket' at Invictus, establishing it as the largest financial simulation event across Indian technical festivals, attracting massive student participation nationwide.
- Handled corporate sponsorships and strategic industry partnerships to secure funding and support large-scale academic initiatives.
